

240 Litre Container

Holds Approximately 3-4 bags.

Secure lockable wheeled containers which are easy to handle. Colour coded lids for easy identification of waste stream. Information sticker on your lid to avoid any confusion about what goes where.

360 Litre Container

Holds Approximately 4-8 bags.

All collections are ticketless but recorded by the collection vehicle via a microchip embedded into the container, this enables us to monitor container collection activity and charge by your average weight offering clear, transparent billing.

660 Litre Container

Holds Approximately 8-10 bags.

The UK's most popular trade waste containers, wheelie bins are ideal for small volume light weight compactable material at locations where space is limited.

1100 Litre Container

Holds Approximately 15-20 bags

All container sizes are available for the following waste streams to suit the needs of your operation: Dry Mixed Recycling, Food Waste, Glass Recycling and Residual Waste collections.

FRONT END LOADER

FEL

Secure lockable steel container with colour coded lids for easy identification of waste stream.

Designed for compactable waste at sites where wheelie bins do not provide enough storage for waste. Ideal for organisations that produce large volumes of packaging or light black bag waste.
